Summary

Software Developer with over 2+ years of experience in building scalable and performance-driven web applications using React.js, Next.js, JavaScript, and TypeScript. Experienced in responsive UI development, REST API integration, state management, and frontend performance optimization. Proficient in Tailwind CSS, Material UI, and AI-powered development tools such as Cursor, Claude, and ChatGPT. Hands-on knowledge in SQL Server, Python (Pandas), data cleaning, data transformation, SQL query optimization, and developing views and stored procedures to support reporting and business data management.

Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Chart.js

UI Frameworks & Styling: Tailwind CSS, Material UI, Responsive Web Design

Databases: Node.js, MongoDB, Microsoft SQL Server

Data Analysis: Python (Pandas), SQL Server, Data Cleaning, Data Transformation

API & Data: Web API, REST APIs, GraphQL, JSON, API Integration

State Management: Redux Toolkit, Context API, React Hooks

Authentication: JWT, OAuth

Repositories: Git, GitHub

Testing Tools: Postman, Unit Testing, Jest

AI-Assisted Tools: AntiGravity AI, Cursor AI, Claude, ChatGPT

Scrum Tools: Agile, Jira

Work Experience

CodingLimits Pvt Ltd

Nov 2025 – Jan 2026

Frontend Developer

Project: MockWin.ai – AI-Powered Interview Platform

MockWin.ai is an AI-powered, multi-tenant interview platform that enables candidates to practice mock interviews with real-time feedback, while helping enterprises manage hiring pipelines and candidate evaluations at scale.

Tech Stack: Next.js, React.js, TypeScript, Tailwind CSS, REST APIs, FastAPI, React Speech Recognition, Cursor AI, Claude, ChatGPT, Git.

Roles & Responsibilities:

- Developed scalable and responsive web applications using Next.js, React.js, TypeScript, and Tailwind CSS.
- Built reusable UI components to improve application maintainability and development efficiency.
- Integrated FastAPI-based AI services and managed REST API communication for interview workflows.
- Implemented JWT authentication and Role-Based Access Control (RBAC) for secure user access.
- Managed AI interview flow, application state, loading states, and error handling for a seamless user experience.
- Collaborated with AI and backend teams using Git, Agile methodologies, and CI/CD pipelines.
- Leveraged AI-assisted tools including Cursor AI, Claude, and ChatGPT to accelerate development and improve code quality.

Key Achievements:

- Built and integrated frontend modules for AI-driven Speech-to-Text and Text-to-Speech features, enabling seamless interview interactions.
- Developed reusable components that accelerated feature delivery and ensured a consistent user experience across multiple modules.

PosGuru Private Limited

Oct 2024 – Apr 2025

React.js Developer

Project: Restaurant Management & POS Solution

A cloud-based Point of Sale (POS) and restaurant management platform designed to streamline order processing, inventory management, billing, customer management, and real-time business analytics for restaurants.

Tech Stack: React.js, TypeScript, Redux Toolkit, Bootstrap, Material UI, Axios, REST APIs, Chart.js, Git, Jira, Postman.

Roles & Responsibilities:

- Developed responsive and scalable web applications using React.js, TypeScript, Redux Toolkit, Bootstrap, and Material UI.
- Built reusable modules for product, category, pricing, customer, and restaurant management.
- Integrated REST APIs using Axios to manage orders, inventory, billing, and customer data.
- Built interactive dashboards using Chart.js to visualize sales and business insights.
- Optimized application performance with search, filtering, sorting, pagination, and debouncing techniques.
- Collaborated with backend teams using Git, Jira, Postman, and Agile methodologies to deliver high-quality features.

Key Achievements:

- Reduced redundant API requests and improved search performance by implementing debouncing, enhancing application responsiveness.
- Built dynamic coupon management forms with validation, improving promotional campaign and discount management workflows.

ASU Technologies & Services Pvt Ltd

Apr 2023 – Aug 2024

Software Developer

Project: Digital Advertising & Campaign Management Platform (PureRED)

Build a B2B digital advertising platform for PureRED, enabling businesses to create, manage, and publish targeted marketing campaigns with location-based advertising, campaign management, and business analytics.

Tech Stack: React.js, HTML5, CSS3, Bootstrap, Material UI, REST APIs, JWT, OAuth, SQL Server, Python (Pandas), Git, Jira.

Roles & Responsibilities:

- Developed responsive and user-friendly web interfaces using React.js, HTML5, CSS3, Bootstrap, and Material UI.
- Built reusable CRUD modules with filtering, sorting, pagination, and campaign management functionalities.
- Integrated REST APIs and collaborated with backend teams to ensure seamless frontend and backend communication.
- Implemented JWT and OAuth authentication to provide secure user access and authorization.
- Processed and cleaned Excel datasets using Python (Pandas) to improve data quality and reporting accuracy.
- Worked with SQL Server Management Studio (SSMS) to write SQL queries, create database views, and develop stored procedures for client reporting requirements.
- Collaborated with cross-functional teams using Git, Jira, and Agile methodologies throughout the development lifecycle.

Key Achievements:

- Automated Excel data cleaning and transformation using Python (Pandas), reducing manual effort and improving data accuracy.
- Developed SQL views and stored procedures that streamlined client reporting and simplified data retrieval.

Education

MCA

Graduated: 2023

Dr. Lankapalli Bullayya College (Affiliated to Andhra University)
